

Title: Mechanical Engineer II

Location: San Diego, CA

Type: Contract

Contact: paul@hulkegr.com

Summary

Our company needs a Mechanical Engineer II to be actively involved in overseeing instrumentation verification and support design projects.

- Knowledge of SolidWorks a must have.
- Data manager experience with Enovia a plus.
- You will primarily support the Engineering group by resolving medical device instrumentation issues, supporting and being actively involved with System Verification activities, as well as supporting Manufacturing and Field Service.
- Day-to-day activities will be to help with supporting project verification tasks, troubleshooting issues, running instrument tests, analyzing data, helping with project documentation such as change orders, test reports, DFMEA's, and risk assessments.

Must haves:

- You must be willing to go find answers on your own without constant supervision
- Proficient in Solidworks
- Experience with CAD databases
- Experience with Design documentation
- Good interpersonal, written, and oral communication skills
- 4-year degree in Mechanical Engineering
- 2+ years of experience, or 0-2 years with Master's degree
- Experience in a regulated industry (medical, military, automotive, space)
